

# WASH HANDS

*to protect against germs*

# ASK QUESTIONS

*to improve quality of care*

# VACCINATE

*against flu and pneumonia*

# ENSURE SAFETY

*by making sure medical devices are clean and used properly*

## Do the WAVE against healthcare-associated infections.

It's a great way to help protect loved ones against infections when they're in the hospital.

Created by the HHS Partnership for Patients. Find out more: [www.healthcare.gov/partnershipforpatients](http://www.healthcare.gov/partnershipforpatients).
